Product	Use	Waste generated	Proposal to reduce impact	Other Considerations
Mitex	Plasterboard Margins	Off Cut	Detailed on site rolling measure , off site measure pre order.	Due to the nature of Mitex and the method used to install it off cut only occurs at one point of each run thus reducing waste.
SAS Ceiling Grid	Support to ceiling tiles	Off cuts	Ceiling grid has been ordered to modular sizes to negate the need for on site cutting.	In the few instances where site cutting is required waste will be placed in the correct bins for recycling , this will be monitored by BPC floor Manager
SAS Primary Grid	Suspension of & Support for ceiling Grid	Off Cuts	Waste will be reduced to a minimum by using any larger cuts of material else where on site.	Any off cut too small to be used will be recycled by placing in correct bins on site
Ceiling tiles	Ceiling membrane	Cut panels	Minimal amount of cut tiles due to the design. Re use larger cuts	Any cut panel that can not be re used will be separated and recycled
Gypsum jointing compounds	Tape & jointing plasterboard ceilings & margins.	Dust when sanding, mixing surplus materials	Use mechanical extraction where possible.	Gypsum jointing compounds should be disposed of with plasterboard for recycling .
MDF	Added support for partitions & services	Off cuts	Panels will be ordered to pre cut sizes, reducing site cuts	Any off cuts too small to be reused else where on site will be separated from other waste and recycled.

SAS packaging	Protection & storage of ceiling grid and tiles	Wood planks from packing cases & pallets	SAS will will collect and re-use pallets used to deliver ceiling tiles/products	Collected by delivery lorry once emptied
